

Annual Calibration

For annual calibration ship to:

Calibrations c/o Enhanced Inspection Solutions, Inc.

4000 Yates Mill Pond Rd.

Suite 202

Raleigh, NC 20606

Note:

Depending on your EsKalometer ® Serial Number, we do offer an upgrade from the original model bringing the capacity of the unit up to 500 Kg, allowing for the horizontal impact test to be performed not only from either side of the step plate, but also from the center.

Please include in the case:

- A copy of your current FedEx Account Number or a pre-printed return label from your preferred shipper.
- A copy of a Purchase Order should one be required, though a company credit card is often used for payment (we will reach out for this information at time of service if this payment method is preferred).
- Contact information for the individual responsible for payment/return recipient if different from original shipping address.
- Should you desire to upgrade your EsKalometer ® to the 500 Kg model or any additional comb simulator plates needed, please include a note of this.

Place Zip Ties on the locking lugs of the case before shipping to ensure security during transit.

If you have any additional questions/concerns, please contact us directly.
